

Wound Care: Real People, Real Challenges

- 15% of Medicare recipients have chronic wounds, at an annual cost of nearly \$100 billion
- Difficult to treat wounds
- Wounds that are challenging or don't improve over time
- Need for improved, more innovative techniques in wound care

Non-healing wounds are devastating for patients and for their caregivers, as well. Without proper care, they can have serious consequences.

Our approach is unique. We come to you, in your home. We assess your situation, develop a personalized care plan, and coordinate treatment with physicians.

*"ALC Advanced
Wound Care treats
the whole person,
not just the hole in
the person."*

ALC Advanced Wound Care

*State-of-the art care in the
comfort and safety of your home*

Our Services

ALC Advanced Wound Care's trained medical providers specialize in treating acute and chronic nonhealing wounds.

- State-of-the-art medical technology, products, and practices.
- Advanced wound care addresses a variety of clinical needs for skin and dermal substitute applications, and supports healing of acute and chronic wounds.
- We will review your existing comorbidities and lifestyle to identify factors that may impact healing.
- We seek to heal not only wounds, but to provide holistic, whole-person care, as well.
- ALC Advanced Wound Care educates patients and caregivers about proper wound care management.

We provide advanced wound care services to patients in the comfort and safety of their home environment.
